

Digital Signage Kiosk SVLK Series

High definition UHD commercial grade portrait kiosk designed for 24/7 applications

Our Digital Signage Kiosk SVLK Series is designed for areas with heavy footfall providing access to information, entertainment and commerce applications. The kiosk comes complete with HDMI connections allowing you to connect to any PC or Laptop. Boasting an aluminum hairline finish and robust glass surface, it can reliably withstand external shocks while also blending in with its surroundings.

Key features

- LCD technology with LED backlight, 3840x2160 resolution, 350 nits
- By using the visual extension technology it will give an easy 178 degrees viewing angle. No deformed pictures and no color distortion, perfect view
- Our units equipped with high quality digital audio outputs
- Designed for 24/7 operation
- Anti-glare coating
